

Automatic Debagger

Revolutionary Loading System That Swings You Into Action With Benefits Never Before Achieved

Our fully automatic debagger puts your bottles back on the line in a quick and truly hands-off fashion.

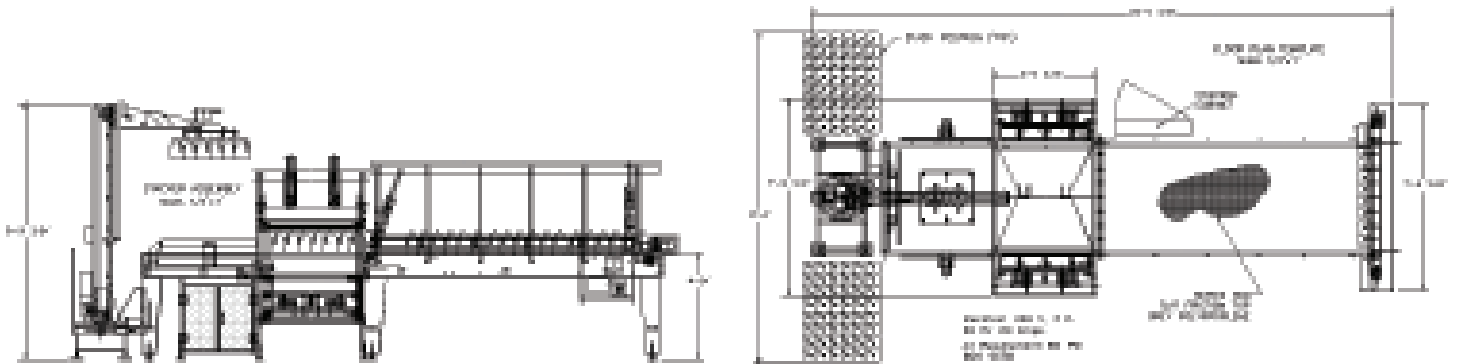

Automatic de-stacker takes the bags from their shipping/storage stacks and places them on the machine, allowing the bags to be removed and bottles to be placed back on the line without losing orientation.

Safe and efficient, our automatic debagger is also easy to operate with an interactive PLC touchscreen that also offers on-line diagnostics.

**FOOTPRINT, POWER
AND AIR REQUIREMENTS TO COME.**
